

A two year PostDoc fellowship and a two year graduate contract position are available in Barcelona for qualified atmospheric modelers.

An expanding R&D company in Barcelona is looking for expert modelers and data analysts for a challenging climate simulation initiative.

Person specification:

- Mesoscale modelling and large scale data analysis experience is required for both positions.
- Experience with Reanalysis data files and the corresponding treatment software knowledge will be evaluated.
- Large experience in LINUX
- Programming skills (fortran, shell...)
- Experience with file formats HDF, netCDF, GRIB...
- Knowledge of statistics and statistical programs (cluster analysis, principal component analysis...)
- Familiar with WRF/MM5 models is recommended.
- Postdoc candidate must hold a PhD qualification obtained after 2002.

Location: Barcelona, Spain

Competitive Salary according to experience and flexible working scheme.

Deadline: 11 April 2008

Starting date: as soon as possible.
