

Dear colleague,

We are pleased to announce the
The ModObs Summer School on Air-Sea Interaction.

The summerschool is organized within the Marie Curie Training Network
" ModObs" (www.windeng.net).

Directed to the PhD students within the network, it is open to any
graduated or PhD student, and Post docs interested in the air-sea
interaction subject. The host Organisation is the Institute of
Atmospheric Sciences and Climate (ISAC) of the Italian National
Council of Research (CNR).

We will address current progress in the understanding of processes at
the air-sea interface and in the atmospheric boundary layer in open
sea and coastal area environments. We will focus on the connection
between advances in our fundamental understanding of surface processes
and the application of this knowledge to the largest scales. Also, we
will discuss the importance of satellite remote sensing and numerical
modeling as bridges between the small-scale process studies and large-
scale circulation of the ocean-atmosphere system.

The venue is Hotel Orsa Maggiore, Castro Marina, Italy (Apulia
Region).

Date of the venue 11 -16 June 2007.

You can find the program of the school, and all the information
concerning costs and transportation on the website

<http://modobs.le.isac.cnr.it>.

For further information, please send an email to:

modobs@le.isac.cnr.it.
